

## Signetdata.com: High Five Reports - Sheep

Signet clients can access a range of reporting tools at [www.signetdata.com](http://www.signetdata.com). To get started clients should log into their account by clicking “Member Access” (top right).

### High Five List

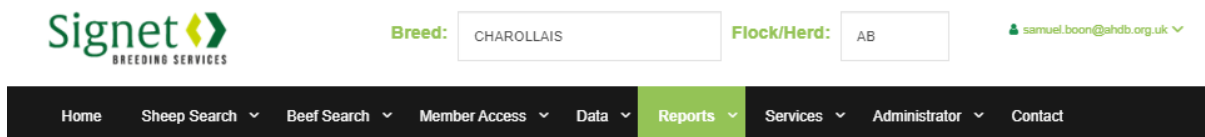

The High Five list shows the top five lambs with a scan weight in each flock in the country, ranking animals on index 1. For Terminal Sires, this will be the Terminal Sire Index.

- 1) Go to “Reports” and click on “High Five List – Sheep”

The screenshot shows the Signet website header with the logo on the left and user information on the right. The main navigation bar includes: Home, Sheep Search, Beef Search, Member Access, Data, Reports, Services, Administrator, and Contact. The 'Reports' dropdown menu is expanded, showing 'Flock Report' and 'Breed Summary - Sheep', with 'High Five List - Sheep' listed as a sub-option under 'Breed Summary - Sheep'.

- 2) Select your location, the distance you are willing to travel, the breed of interest, the sex of the animal and the age range – to pull back either ram lambs or shearlings.

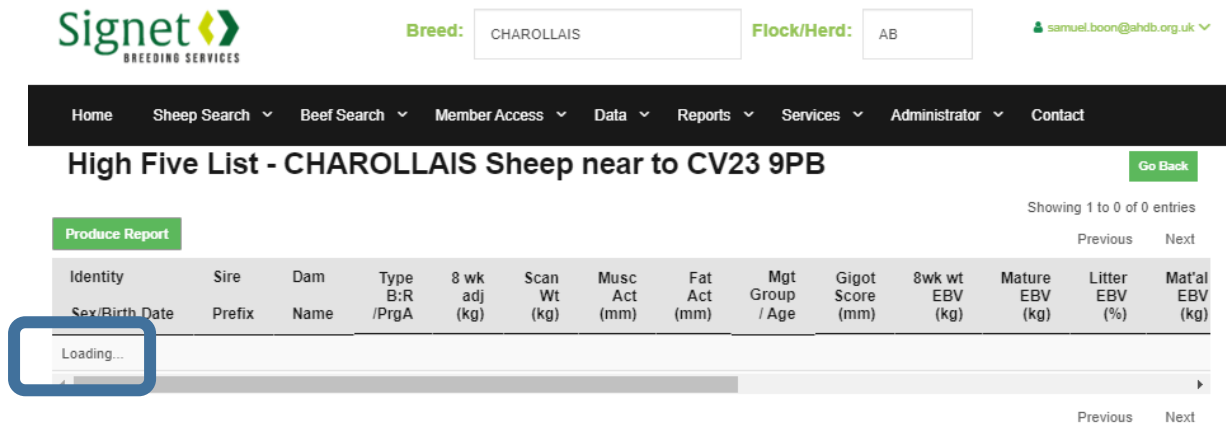

The screenshot shows the 'High Five List' report form on the Signet website. The form includes the following fields: Postcode (CV23 9PB), Within Distance (100 miles), Breed (CHAROLLAIS), Sex (Male), Born After (06-09-2018), and Born Before (06-09-2019). A green 'Run Report' button is located at the bottom of the form.

### High Five List

Signet's reporting services are currently being re-developed to provide clients with faster, clearer and more customer focussed online reports. In the short term, trait leaders within a breed can be easily located by using "EBV Search" – selecting the breed, sex and age of animals of interest. A new function within EBV Search now enables the user to select on the basis of progeny number, producing lists that only contain sires and dams.

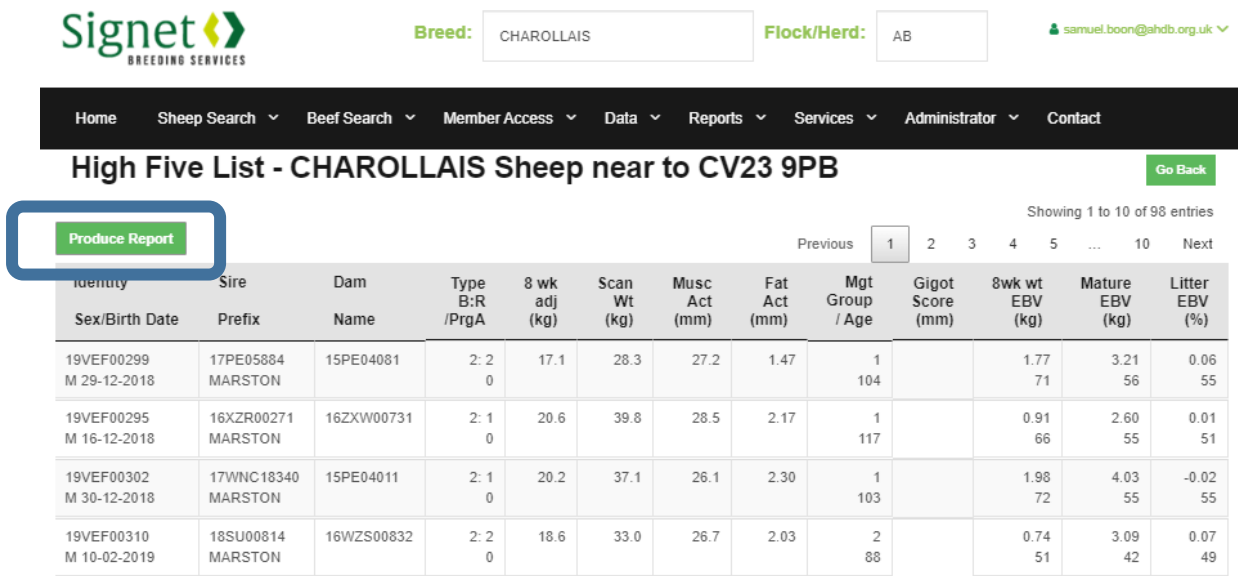

Postcode	<input type="text" value="CV23 9PB"/>
Within Distance	<input type="text" value="100 miles"/>
Breed	<input type="text" value="CHAROLLAIS"/>
Sex	<input type="text" value="Male"/>
Born After	<input type="text" value="06-09-2018"/>
Born Before	<input type="text" value="06-09-2019"/>
	<input type="button" value="Run Report"/>

3). Give it a minute – this is a big report and takes a moment or two to run. The table will say “Loading...”

The screenshot shows the Signet Breeding Services interface. At the top, there is a navigation bar with links for Home, Sheep Search, Beef Search, Member Access, Data, Reports, Services, Administrator, and Contact. Below this is a search area with 'Breed: CHAROLLAIS' and 'Flock/Herd: AB'. A user profile for 'samuel.boon@ahdb.org.uk' is visible. The main heading is 'High Five List - CHAROLLAIS Sheep near to CV23 9PB'. A 'Produce Report' button is highlighted with a blue box. Below the button is a table with columns for Identity, Sire, Dam, Type, 8 wk adj, Scan Wt, Musc Act, Fat Act, Mgt Group, Gigot Score, 8wk wt EBV, Mature EBV, Litter EBV, and Mat'al EBV. The first cell of the table contains the text 'Loading...'.

4). A table will be produced with results – press “Produce Report” to turn this into a pdf, that can be opened, saved, printed or forwarded to other breeders.

The screenshot shows the same Signet Breeding Services interface as above, but now displaying a table of results. The 'Produce Report' button is highlighted with a blue box. The table has 14 columns: Identity, Sex/Birth Date, Sire Prefix, Dam Name, Type B:R /PrgA, 8 wk adj (kg), Scan Wt (kg), Musc Act (mm), Fat Act (mm), Mgt Group / Age, Gigot Score (mm), 8wk wt EBV (kg), Mature EBV (kg), Litter EBV (%), and Mat'al EBV (kg). The table contains 4 rows of data for sheep with IDs 19VEF00299, 19VEF00295, 19VEF00302, and 19VEF00310. A 'Produce Report' button is also visible at the top left of the table area.

### If at first you don't succeed...

This is a massive report and sometimes users will get a “Timeout” message the first time they run the report, particularly if it is a big breed.

Try again – the system is designed to save some of your enquiry, to run faster the second or third time – so there is a strong likelihood you will be second time lucky.

If this doesn't work you may need to get a faster internet connection or limit the distance within your search. If you are having problems – email us and we will send you one.
