SUFFOLK SIGNET BREEDERS CATALOGUE

Welcome to the THIRD edition of the Suffolk Signet Breeders Catalogue of Rams.

I hope you find this useful and a helpful tool.

Due to the fact that this is only an electronic catalogue, there are advantages in that the rams that have been selected for this catalogue EBV figures are never out of date.
If you hit the
https://signetdata.com/animaldetails?id=900000802
below each ram's EBV figures it will take you to the updated figures.

The rams selected are considered the best rams in each flock for **sale.** Each ram is considered suitable to use in their own flock otherwise they wouldn't be presented.

We have a range of types of Suffolk sheep, from rams that will breed you show winners to the low cost grass based systems. All are commercially viable.

All rams are Signet recorded and in some cases some have been CT scanned.

COMMENTS

An excellent ram lamb with sturdy legs and a showy head. Sired by Sitlow Evoque and from one of my best breeding ewes this lamb has a great carcase and a maternal index in the Top 10% of the breed. Sitlow Evoque has added some outstanding traits to the Powerline flock notably lumber and spine number and length. This lamb is no exception with a Lumber Number of 0.04 (Top 5%). This lad weighed 75kg at 168 days and is ready for work.

'00340 was shown on 27th June at Bury Show, Lancashire. He came second in his class out of 7 in the line.

This shearling has an impressive presence. He is tall, long, deep and wide and stands really well. He is in the top 1% for Terminal Index, Muscle Depth, Lean weight and Eye muscle area. His Sire has performed very well in the Ram Compare project. He was born and reared a twin. He is a naturally fleshy ram. Since he was weaned, he has been reared entirely on grass and outwintered in the north of Scotland. Essie flock is Scrapie Monitored and the shearlings have been tested clear of CLA for more than 15 years.

This shearling is in the top 1% for Terminal Index, Maternal Index, Eye muscle area, Lean weight and top 2% for Muscle Depth EBV. His sire, Essie Classic, was top UK Stock Sire for Terminal Index for Performance Recorded rams in March 2021 and has consistently left great lambs in the flock for 3 years. Since he was weaned, this shearling has been reared entirely on grass and outwintered in the north of Scotland. Essie flock is Scrapie Monitored and the shearlings have been tested clear of CLA for more than 15 years.

COMMENTS

This shearling is in the top 1% for Terminal Index, Maternal Index, Eye muscle area, Lean weight, top 2% for Muscle Depth EBV and top 3% for Scan Weight EBV. His Sire was top UK Performance Recorded Stock Sire for Terminal Index as a shearling and top Stock Sire for Maternal Index the next year. His sire also sired the top Sire, Essie Commander, for Terminal Index in May 2020. He is a naturally fleshy ram. Since he was weaned, he has been reared entirely on grass and outwintered in the north of Scotland. Essie flock is Scrapie Monitored and the shearlings have been tested clear of CLA for more than 15 years.

This shearling is solid, deep bodied and powerful and stands well. He is a naturally fleshy ram. He is in the top 1% for Maternal Index, 8 week weight EBV and Scan weight EBV, and the top 3% for Terminal Index and Muscle depth EBV. His Sire, Essie Cassius, has consistently left great lambs in the flock for 3 years. His sire has also left terrific lambs in USA and his semen is on its way to Canada and Hungary. Since he was weaned, this shearling has been reared entirely on grass and outwintered in the north of Scotland. Essie flock is Scrapie Monitored and the shearlings have been tested clear of CLA for more than 15 years.

Our highest indexed ram of the year, this son of Midhope Mission shows many of the attributes required in a quality terminal sire- size, length and growth with a tight skin, wide deep loin and light bone.

Twin born and reared. Top 5%scan weight and top 1% muscle depth EBV. Terminal sire index and maternal index in the top1%

COMMENTS

Top price ram at 2020 Sandyknowe Sale purchased for £3,500. He is extremely well fleshed and has a great carcass with width all the way along his top line. Figures to match with scan weight and muscle depth EBVs in the top 1%, with over 100 progeny on the ground giving his figures >90% accuracy. Has bred well in his first year really stamping his lambs. Lambs have shown excellent vigour at birth. Used as a stock ram in the Sandyknowe flock as a lamb. Dam also bred another Sandyknowe stock ram, that was subsequently used in the Hans flock.
